

ACKNOWLEDGEMENTS

Various individuals contributed to the completion of these studies. Special thanks are extended to the Trenton Historical Society, and in particular to Gary Nigh and Jerome Harcar, the two officers of this organization who have been most responsible for overseeing this work. Both of these individuals have shown extraordinary interest in the progress of the research and have assisted us greatly by making contact with persons involved in the archaeological investigations carried out in 1976-81. Largely through their perseverance we have been able to identify and interview many key participants, most notably David Collier, Arthur Forman, Mary Alice Quigley and Emil Gombosi. We also gratefully acknowledge the financial support of the New Jersey Historical Commission that has made this study possible. We appreciate the efforts of Mary Murrin, the Commission staff member responsible for administering the grant.

The staffs of several research repositories and libraries have helped us throughout our work. We acknowledge most especially the staffs of the New Jersey Historic Preservation Office, the New Jersey State Archives, the New Jersey State Library, the Burlington County Historical Society, the Mercer County Courthouse, the Trenton Free Public Library and the Historical Society of Pennsylvania. The many staff of these latter two institutions, in particular, have made our accessing of their valuable holdings nothing short of a pleasure.

Overall direction for this project was provided by Richard Hunter. Background research for this survey was performed by Nadine Sergejeff under the supervision of Damon Tvaryanas. Archaeological analysis and cataloging of artifacts were mostly undertaken by Rebecca White and William Liebeknecht. The report graphics were prepared by Michael Murphy with assistance from Frank Dunsmore. Final report coordination and assembly were undertaken by Michael Murphy with assistance from James Lee and Richard Hunter. This report was authored by Rebecca White, Nadine Sergejeff, William Liebeknecht and Richard Hunter.

Richard Hunter, Ph.D, R.P.A.
